COVID-19 and Renal Disease

Guest Editor:

Dr. Silvia Lai

Department of Translational and Precision Medicine, Nephrology and Dialysis Unit, Sapienza University of Rome, Rome, Italy

Deadline for manuscript submissions:

closed (31 October 2022)

Message from the Guest Editor

The prevalence of acute kidney injury and/or chronic kidney disease and/or abnormal urinalysis in patients diagnosed with COVID-19 seems to be high and appears as a negative prognostic factor. Urinalysis appears to be very useful in unveiling potential kidney impairment of COVID-19 patients therefore urinalysis could be used to reflect and predict the disease severity. Therefore we believe it is important to evaluate short and long term renal impairment in SARS-COV2 infection. Moreover electrolytic, inflammatory and metabolic alterations should be evaluated in these patients, as they could worsen the prognosis in the short and long term. Another important aspect to evaluate is the response to SARS-COV 2 vaccines which have in some cases presented renal involvement.

Special Issue

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Jay Fox

Department of Microbiology,
University of Virginia,
Charlottesville, VA, USA

Message from the Editor-in-Chief

Toxinology is an incredibly diverse area of study, ranging from field surveys of environmental toxins to the study of toxin action at the molecular level. The editorial board and staff of *Toxins* are dedicated to providing a timely, peer-reviewed outlet for exciting, innovative primary research articles and concise, informative reviews from investigators in the myriad of disciplines contributing to our knowledge on toxins. We are committed to meeting the needs of the toxin research community by offering useful and timely reviews of all manuscripts submitted. Please consider *Toxins* when submitting your work for publication.

Author Benefits

Open Access: free for readers, with **article processing charges (APC)** paid by authors or their institutions.

High Visibility: indexed within **Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, CAPlus / SciFinder, AGRIS, and other databases.**

Journal Rank: JCR - Q1 (Toxicology) / CiteScore - Q1 (Toxicology)
