## Exposure to Mycotoxins via Food Chain

Guest Editors:

### **Dr. Frantisek Malir**

Faculty of Science, University of Hradec Kralove, Rokitanskeho 62, CZ- 500 03 Hradec Kralove, Czech Republic

### **Dr. Vladimir Ostry**

Center for Health, Nutrition and Food, National Institute of Public Health in Prague, Palackeho 3a, CZ-61242 Brno, Czech Republic

Deadline for manuscript submissions:  
**closed (31 March 2021)**

### **Message from the Guest Editors**

Mycotoxins are the common contaminants of various foodstuffs of both plant and animal origin. Mycotoxins can enter food directly or indirectly during the production, transportation, processing, or storage of food. Mycotoxins contaminate the food chain despite compliance of Good Agricultural Practices, Good Manufacturing Practices and Hazard Analysis and Critical Control Points. Dietary exposure to mycotoxins represents a significant risk to human and animal health because mycotoxins are both acutely and chronically toxic. Indeed chronic exposure to low mycotoxins doses could be even more hazardous than acute exposure to a high dose. To reduce the risks associated with mycotoxins, and minimize their overall impact on public health, continuous monitoring of their presence in foods is necessary, in conjunction with strict respect of the legislation in the EU and the world. The control of mycotoxins in foods is a constantly evolving process and the obtained data are very important for the realisation the dietary exposure assessment and health risk assessment to mycotoxins.

## Message from the Editor-in-Chief

Toxinology is an incredibly diverse area of study, ranging from field surveys of environmental toxins to the study of toxin action at the molecular level. The editorial board and staff of *Toxins* are dedicated to providing a timely, peer-reviewed outlet for exciting, innovative primary research articles and concise, informative reviews from investigators in the myriad of disciplines contributing to our knowledge on toxins. We are committed to meeting the needs of the toxin research community by offering useful and timely reviews of all manuscripts submitted. Please consider *Toxins* when submitting your work for publication.

## Author Benefits

**Open Access:** free for readers, with **article processing charges (APC)** paid by authors or their institutions.

**High Visibility:** indexed within **Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, CAPlus / SciFinder, AGRIS, and other databases.**

**Journal Rank:** JCR - Q1 (Toxicology) / CiteScore - Q1 (Toxicology)
