Message from the Guest Editors

Mycotoxins are secondary metabolites of fungi that grow in or on crops and are known to cause human and animal diseases. Although some of these strategies have been observed to be effective for mycotoxin controlling and removal from food commodities, however, there are several problems and limitations associated to most of them that still need overcoming.

This Special Issue will address these limitations and will collect data on the most recent advances related to mitigating mycotoxin contamination in food and feed, including masked and emerging mycotoxins, and co-occurring mycotoxins with other chemical and biological contaminants. It will review the latest developed technologies for controlling mycotoxins, including preharvest prevention strategies and postharvest decontamination procedures that minimize mycotoxin hazards and increase consumer safety. The Special Issue, providing new insights into the detoxification and elimination of mycotoxins with developing innovative control strategies, intends to be beneficial to the food and feed industry.

Message from the Editor-in-Chief

Toxinology is an incredibly diverse area of study, ranging from field surveys of environmental toxins to the study of toxin action at the molecular level. The editorial board and staff of *Toxins* are dedicated to providing a timely, peer-reviewed outlet for exciting, innovative primary research articles and concise, informative reviews from investigators in the myriad of disciplines contributing to our knowledge on toxins. We are committed to meeting the needs of the toxin research community by offering useful and timely reviews of all manuscripts submitted. Please consider *Toxins* when submitting your work for publication.

Author Benefits

Open Access: free for readers, with **article processing charges (APC)** paid by authors or their institutions.

High Visibility: indexed within **Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, CAPlus / SciFinder, AGRIS, and other databases.**

Journal Rank: JCR - Q1 (Toxicology) / CiteScore - Q1 (Toxicology)
