Advances in Transplant Infectious Diseases

Guest Editors:

Dr. Justyna E. Gotębiewska

Department of Nephrology,
Transplantology and Internal
Medicine, Medical University of
Gdańsk, ul. Dębinki 7, 80-952
Gdańsk, Poland

Prof. Dr. Alicja Dębska-Ślizień

Department of Nephrology,
Transplantology and Internal
Medicine, Medical University of
Gdańsk, ul. Dębinki 7, 80-952
Gdańsk, Poland

Dr. Dorota Kaminska

Department of Nephrology and
Transplantation Medicine,
Wrocław Medical University, ul.
Borowska 213, 50-529 Wrocław,
Poland

Deadline for manuscript
submissions:

closed (31 May 2022)

Message from the Guest Editors

Solid organ transplants (SOTs) are life-saving interventions. New potent immunosuppressive strategies have enabled transplantations in high immunological risk patients, retransplantations, or ABO-incompatible transplantations at the expense of an increased recipients' susceptibility to various infections. Despite targeted prophylaxis, surveillance, and risk stratification, infectious complications remain a major cause of morbidity and a principal cause of death in this population. SOT recipients experience a high burden of infections with a specific temporal pattern, with rare opportunistic pathogens and a predominance of bacteria. In this Special Issue, we will address the whole spectrum of infectious complications in SOT recipients, including bacterial, fungal, and viral infections. Comprehensive reviews, as well as research (be it basic, translational, or clinical research) or interesting case series or case reports are welcome, with the aim of providing readers with an up-to-date view on the screening, prophylaxis, diagnosis, and management of transplant infectious diseases.

Hospital, 50139 Florence, Italy

Message from the Editor-in-Chief

As a new international and multidisciplinary peer-reviewed open access journal for all areas of clinical and basic science research in transplantation, *Transplantology* publishes original research, reviews, position papers and guideline documents, letters, 'how to do' reports, and rapid communications.

We are all familiar with how transplantation is changing the way we treat patients through new discoveries in immunosuppression, medical treatments, surgical approaches, and basic science research. *Transplantology* aims to ensure that knowledge is shared among transplant centers worldwide in a timely fashion and to provide transplant programs with the opportunity for important research work to be published and shared constructively. The journal supports those who wish to communicate, discuss with colleagues globally, and successfully publish their work at the right place and time.

Author Benefits

Open Access: free for readers, with **article processing charges (APC)** paid by authors or their institutions.

High Visibility: indexed within **Scopus**, and **other databases**.

Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 29.2 days after submission; acceptance to publication is undertaken in 4.2 days (median values for papers published in this journal in the second half of 2025).
