

Recent Outcomes and Future Challenges in Nuclear Astrophysics

Guest Editors:

Dr. Giovanni Francesco Ciani

Physics Department, University of
Bari & INFN BA, 70125 Bari, Italy

Dr. David Rapagnani

Department of Physics, University
of Naples, 80138 Naples, Italy

Dr. Eliana Masha

HZDR - Helmholtz-Zentrum
Dresden-Rossendorf, 01328
Dresden, Germany

Deadline for manuscript
submissions:

31 December 2024

Message from the Guest Editors

In recent years, several new facilities have been built on the Earth's surface and underground, and new experimental techniques have been developed.

Nevertheless, several topics are not yet fully understood: we still do not know the origin of the discrepancy between lithium isotope abundance in old stars, with respect to the values predicted by theory, or how some of the heavy elements are produced. Several crucial nuclear reactions are still unknown in the corresponding stellar energies of interest, or their determination is not precise enough to constrain the models. These, along with several other open questions, require further investigations.

In this Special Issue, we would like to overview the status of nuclear astrophysics and how this subject interfaces with other research fields, such as astroparticle physics, gamma-ray astronomy, cosmology, isotopic abundances in meteorites or the detection of gravitational waves [...].

For further reading, please follow the [link](#) to the Special Issue Website.

universe

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Lorenzo Iorio

Ministero dell'Istruzione e del Merito, Viale Unità di Italia 68, 70125 Bari, BA, Italy

Message from the Editor-in-Chief

The multidisciplinary *Universe* journal is aiming to follow and, hopefully, to lead to the largest extent as possible the ever-self renovating threads which weave mathematical theories with our understanding of the magnificent natural world. On behalf of all the distinguished members of the editorial board, I extend my welcome to this new journal and look forward to hearing from the interested contributors and learning about their valuable research.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Astrophysics Data System, INSPIRE, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q2 (*Astronomy and Astrophysics*) / CiteScore - Q2 (*General Physics and Astronomy*)
