## Probing Structure, Morphology and Dynamics of Galaxies

Guest Editor:

**Prof. Dr. Marc S. Seigar**

Department of Physics &  
Astronomy, University of  
Minnesota Duluth, Duluth, MN  
55812, USA

Deadline for manuscript  
submissions:

**closed (30 April 2022)**

### Message from the Guest Editor

Dear Colleagues,

This volume will focus on the formation and evolution of disk galaxies from Local Group galaxies and nearby galaxies to the most distant galaxies in the Universe. The nearest galaxies are critical objects for our understanding of the galaxy picture. Properties of Local Group galaxies such as the Milky Way, M31, M33, and their satellites, their correlations with the bulge and halo components, and the effects of interactions with galaxy satellites are critical in understanding the formation of galaxies.

Star formation in galaxies is a subject in which we can expect dramatic new results from multiwavelength observations from space-based and ground-based observatories. By 2020, we should have constraints on galaxy growth timescales and radial dependence from measured star formation rates.

Secular evolution is a subject that is making progress in observational and theoretical extragalactic astronomy. On the observational side, new results concerning the systematic properties of pseudobulges are expected in a few years. On the theoretical side, we plan to cover different topics of this active research area.

## Editor-in-Chief

### **Prof. Dr. Lorenzo Iorio**

Ministero dell'Istruzione e del Merito, Viale Unità di Italia 68, 70125 Bari, BA, Italy

## Message from the Editor-in-Chief

The multidisciplinary *Universe* journal is aiming to follow and, hopefully, to lead to the largest extent as possible the ever-self renovating threads which weave mathematical theories with our understanding of the magnificent natural world. On behalf of all the distinguished members of the editorial board, I extend my welcome to this new journal and look forward to hearing from the interested contributors and learning about their valuable research.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Astrophysics Data System, INSPIRE, CAPlus / SciFinder, Inspec, and other databases.

**Journal Rank:** JCR - Q2 (*Astronomy and Astrophysics*) / CiteScore - Q2 (*General Physics and Astronomy*)
