Message from the Guest Editors

Dear Colleagues,

The idea of the Multiverse, as a collection of possible universes, has entered the area of physics and cosmology for good. Max Tegmark distinguished four levels of this very notion, starting from a collection of standard inflationary patches of space-time to finally defining it as a collection of all possible mathematical entities. The term 'Multiverse' was first suggested by a philosopher—William James—who said "Visible nature is all plasticity and indifference, A MULTIVERSE, as one might call it, and not a universe" ("Is life worth living?", *International Journal of Ethics* 6, 10 (1895)). [...]

Message from the Editor-in-Chief

The multidisciplinary journal *Universe* is aiming to follow and, hopefully, to lead to the largest extent as possible the ever-self renovating threads which weave mathematical theories with our understanding of the magnificent natural world. On behalf of all the distinguished members of the Advisory and Editorial Boards, I extend my welcome to this journal and look forward to hearing from the interested contributors and learning about their valuable research.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Astrophysics Data System, INSPIRE, CAPlus / SciFinder, Inspec, and other databases.

Journal Rank: JCR - Q2 (Astronomy and Astrophysics) / CiteScore - Q2 (General Physics and Astronomy)
