

Special Issue

Insights in Space Weather and Space Climate of the Solar System

Message from the Guest Editors

Space weather is of rising importance both in scientific and social areas, and as the space weather observations expand to cover several tens of years, space climate research is of rising importance, too. This Special Issue aims to collect theoretical, observational, numerical simulation and model validation papers. Potential topics include but are not limited to solar flare, sunspot and active region, solar energetic particles, coronal mass ejection, solar wind, geomagnetic storm and substorm, ionospheric irregularity and storm, space weather modeling and forecast, and model validation. This Special Issue especially welcomes papers on long-term space climate research, as well as the possible impacts of space weather and space climate on weather and climate.

About the Journal

Message from the Editor-in-Chief

The multidisciplinary *Universe* journal is aiming to follow and, hopefully, to lead to the largest extent as possible the ever-self renovating threads which weave mathematical theories with our understanding of the magnificent natural world. On behalf of all the distinguished members of the editorial board, I extend my welcome to this journal and look forward to hearing from the interested contributors and learning about their valuable research.

Editor-in-Chief

Prof. Dr. Lorenzo Iorio
Ministero dell'Istruzione e del Merito, Viale Unità di Italia 68, 70125 Bari,
BA, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Astrophysics Data System, INSPIRE, CAPIus / SciFinder, Inspec, and other databases.

Journal Rank:

JCR - Q2 (Astronomy and Astrophysics) / CiteScore - Q2 (General Physics and Astronomy)
