submissions:

30 June 2024

Message from the Guest Editor

Dear Colleagues,

I'm pleased to invite you to participate in my Special Issue on 'Immune response in the efficacy of vaccines'. Vaccines are very effective health measures and have contributed to eradicating some diseases. However, the response rates are low in some individuals due to different factors able to modulate the immune system, both in its adaptive and innate components, such as microbiota and nutrition. Microbiota can be modulated in different ways (i.e., antibiotics, probiotics, and prebiotics), and via nutrition. This Special Issue will focus on the importance of factors modulating immune system in promoting a healthy immune system and its impact on vaccination response.

Message from the Editor-in-Chief

Vaccines (ISSN 2076-393X) has had a 6-year history of publishing peer-reviewed state of the art research that advances the knowledge of immunology in human disease protection. Immunotherapeutics, prophylactic vaccines, immunomodulators, adjuvants and the global differences in regulatory affairs are some of the highlights of the research published that have shaped global health. Our open access policy allows all researchers and interested parties to immediately scrutinize the rigorous evidence our publications have to offer. We are proud to present the work and perspectives of many to contribute to future decisions concerning human health.

Author Benefits

Open Access: free for readers, with **article processing charges (APC)** paid by authors or their institutions.

High Visibility: indexed within **Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.**

Journal Rank: JCR - Q1 (*Immunology*) / CiteScore - Q1 (*Pharmacology (medical)*)
