Message from the Guest Editors

Dear Colleagues,

Vaccination is the most effective way to prevent the spread of SARS-CoV-2 and COVID-19 complications. Evaluation of vaccine safety and efficacy is critical in the pre-clinical stage, and in clinical trials. The molecular immune mechanisms of different vaccines need to be interpreted broadly, including humoral antibody, T-cell and innate immune response in animal models and target populations.

The aim of this Special Issue is to highlight the vaccine research focused on safety and efficacy related to host immunity and COVID-19.

We look forward to receiving your contributions.

Message from the Editor-in-Chief

Vaccines (ISSN 2076-393X) has had a 6-year history of publishing peer-reviewed state of the art research that advances the knowledge of immunology in human disease protection. Immunotherapeutics, prophylactic vaccines, immunomodulators, adjuvants and the global differences in regulatory affairs are some of the highlights of the research published that have shaped global health. Our open access policy allows all researchers and interested parties to immediately scrutinize the rigorous evidence our publications have to offer. We are proud to present the work and perspectives of many to contribute to future decisions concerning human health.

Author Benefits

Open Access: free for readers, with **article processing charges (APC)** paid by authors or their institutions.

High Visibility: indexed within **Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.**

Journal Rank: JCR - Q1 (Immunology) / CiteScore - Q1 (Pharmacology (medical))
