submissions:

9 October 2024

Message from the Guest Editor

Dear Colleagues ,

As Guest Editors, I am glad to announce the Special Issue “Acceptance and Hesitancy in Vaccine Uptake”. This Special Issue aims to identify barriers to vaccination among different populations throughout the world, motivations for vaccination, and vaccine uptake strategies. The main reasons for unwillingness included the belief that the vaccine was unsafe or ineffective and the fear of adverse events. The implementation of effective communication campaigns and health educational programs on safe vaccinations is essential to support strategies to bolster vaccination confidence. In this Special Issue, there will be no limitations on the paper type. Original research articles, reviews, or short communications are warmly welcome.

We look forward to receiving your contributions.

Dr. Sherri Sheinfeld Gorin

Message from the Editor-in-Chief

Vaccines (ISSN 2076-393X) has had a 6-year history of publishing peer-reviewed state of the art research that advances the knowledge of immunology in human disease protection. Immunotherapeutics, prophylactic vaccines, immunomodulators, adjuvants and the global differences in regulatory affairs are some of the highlights of the research published that have shaped global health. Our open access policy allows all researchers and interested parties to immediately scrutinize the rigorous evidence our publications have to offer. We are proud to present the work and perspectives of many to contribute to future decisions concerning human health.

Author Benefits

Open Access: free for readers, with **article processing charges (APC)** paid by authors or their institutions.

High Visibility: indexed within **Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.**

Journal Rank: JCR - Q1 (Immunology) / CiteScore - Q1 (Pharmacology (medical))
