Message from the Guest Editors

Many emerging and re-emerging diseases are significant global threats to animal and public health. As the most effective means of epidemic prevention and control, the development of the vaccine has attracted much attention. From traditional vaccines to genetically engineered vaccines based on DNA recombination technology such as subunit vaccines, live vector vaccines, transgenic plant vaccines, and third-generation vaccines, they play an important role in curbing the spread of animal diseases. We are pleased to invite you to share the latest progress on animal vaccines.

This Special Issue aims to systematically solicit new progress, new technology, and new achievements in various animal vaccines.

For this Special Issue, original research articles and reviews are welcome. Research areas may include (but are not limited to) the following: vaccine-induced immunity, species-specific immunogen design and discovery, and vaccine epidemiology and economics, which will provide a reference for the comprehensive prevention of animal diseases. Criteria for acceptance of an article are innovativeness, clarity, novelty, and relevance to the journal's scope.

Message from the Editor-in-Chief

Vaccines (ISSN 2076-393X) has had a 6-year history of publishing peer-reviewed state of the art research that advances the knowledge of immunology in human disease protection. Immunotherapeutics, prophylactic vaccines, immunomodulators, adjuvants and the global differences in regulatory affairs are some of the highlights of the research published that have shaped global health. Our open access policy allows all researchers and interested parties to immediately scrutinize the rigorous evidence our publications have to offer. We are proud to present the work and perspectives of many to contribute to future decisions concerning human health.

Author Benefits

Open Access: free for readers, with **article processing charges (APC)** paid by authors or their institutions.

High Visibility: indexed within **Scopus**, **SCIE (Web of Science)**, **PubMed**, **PMC**, **Embase**, **CAPLus / SciFinder**, and **other databases**.

Journal Rank: JCR - Q2 (Medicine, Research and Experimental) / CiteScore - Q1 (Pharmacology (medical))
