Message from the Guest Editor

Dear Colleagues,

Respiratory viruses (influenza virus, respiratory syncytial virus) and protozoan parasites (*Plasmodium* spp., *Toxoplasma gondii*, *Leishmania* spp.) continue to threaten public health worldwide. Although many efforts have been made to develop vaccines, effective vaccines are currently lacking for many of these pathogens. This Special Issue focuses on the development of vaccines based on virus-like particles and other platforms against respiratory viruses and protozoan parasites. We invite the submission of any original research articles and reviews on vaccine studies, and they will be highly appreciated.

Message from the Editor-in-Chief

Vaccines (ISSN 2076-393X) has had a 6-year history of publishing peer-reviewed state of the art research that advances the knowledge of immunology in human disease protection. Immunotherapeutics, prophylactic vaccines, immunomodulators, adjuvants and the global differences in regulatory affairs are some of the highlights of the research published that have shaped global health. Our open access policy allows all researchers and interested parties to immediately scrutinize the rigorous evidence our publications have to offer. We are proud to present the work and perspectives of many to contribute to future decisions concerning human health.

Author Benefits

Open Access: free for readers, with **article processing charges (APC)** paid by authors or their institutions.

High Visibility: indexed within **Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.**

Journal Rank: JCR - Q1 (Immunology) / CiteScore - Q1 (Pharmacology (medical))
