Poland

Message from the Guest Editors

This Special Issue is dedicated to preventing diseases transmitted by tick bites, emphasizing the importance of vaccine development and public health strategies. We encourage submissions on topics such as the molecular aspects of vaccine development, the immunogenicity and efficacy of vaccines, immune responses, coverage, and the public's perception and acceptance of these vaccines. Contributions that address the challenges and opportunities in preventing tick-borne diseases are particularly welcome, as they can help shape future research and public health policies.

Deadline for manuscript
submissions:

31 July 2025

Message from the Editor-in-Chief

Vaccines (ISSN 2076-393X) has had a 6-year history of publishing peer-reviewed state of the art research that advances the knowledge of immunology in human disease protection. Immunotherapeutics, prophylactic vaccines, immunomodulators, adjuvants and the global differences in regulatory affairs are some of the highlights of the research published that have shaped global health. Our open access policy allows all researchers and interested parties to immediately scrutinize the rigorous evidence our publications have to offer. We are proud to present the work and perspectives of many to contribute to future decisions concerning human health.

Author Benefits

Open Access: free for readers, with **article processing charges (APC)** paid by authors or their institutions.

High Visibility: indexed within **Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.**

Journal Rank: JCR - Q1 (Immunology) / CiteScore - Q1 (Pharmacology (medical))
