Message from the Guest Editors

Vaccines are unarguably the greatest medical achievement of all time, saving millions of lives worldwide. Therefore, the scope of this Special Issue goes beyond the traditional promotional role of dentists in the vaccination context.

The first thematic area is vaccine hesitancy, a context-specific phenomenon; therefore, vaccination promoters and barriers among dental team members may differ from other healthcare professionals' groups. Dental curricula play a crucial role in helping future dentists understand their roles regarding vaccines and immunization.

The second thematic area is vaccine safety, as oral/orofacial adverse events (AEs) can be reported/found in pharmacovigilance systems, requiring special attention from dental researchers and practitioners. Most of these AEs are mild and rare, but they may undermine the public's confidence in vaccines because they emerge unexpectedly.

The third thematic area is vaccine effectiveness, as dentists and dental team members are threatened by numerous vaccine-preventable diseases during their routine practices; their vaccination schedules need to be regularly updated based on the best available evidence.

Message from the Editor-in-Chief

Vaccines (ISSN 2076-393X) has had a 6-year history of publishing peer-reviewed state of the art research that advances the knowledge of immunology in human disease protection. Immunotherapeutics, prophylactic vaccines, immunomodulators, adjuvants and the global differences in regulatory affairs are some of the highlights of the research published that have shaped global health. Our open access policy allows all researchers and interested parties to immediately scrutinize the rigorous evidence our publications have to offer. We are proud to present the work and perspectives of many to contribute to future decisions concerning human health.

Author Benefits

Open Access: free for readers, with **article processing charges (APC)** paid by authors or their institutions.

High Visibility: indexed within **Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.**

Journal Rank: JCR - Q1 (Immunology) / CiteScore - Q1 (Pharmacology (medical))
