submissions:

closed (30 April 2023)

Message from the Guest Editor

Dear Colleagues,

The pandemic of SARS-CoV-2 infections is a severe threat to human life and the world economic condition. Vaccination is a valid method to protect people from infections. Maximizing the effectiveness of vaccines requires extensive research. Modeling analysis is one useful approach. We are pleased to invite submissions on this topic in this Special Issue. The purpose of this Special Issue is to provide academics with a platform to present their latest research findings, as well as articles that focus on the use of models to study vaccination and vaccine efficacy. In this Special Issue, original research articles and reviews are welcome.

I look forward to receiving your contributions.

Message from the Editor-in-Chief

Vaccines (ISSN 2076-393X) has had a 6-year history of publishing peer-reviewed state of the art research that advances the knowledge of immunology in human disease protection. Immunotherapeutics, prophylactic vaccines, immunomodulators, adjuvants and the global differences in regulatory affairs are some of the highlights of the research published that have shaped global health. Our open access policy allows all researchers and interested parties to immediately scrutinize the rigorous evidence our publications have to offer. We are proud to present the work and perspectives of many to contribute to future decisions concerning human health.

Author Benefits

Open Access: free for readers, with **article processing charges (APC)** paid by authors or their institutions.

High Visibility: indexed within **Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.**

Journal Rank: JCR - Q1 (Immunology) / CiteScore - Q1 (Pharmacology (medical))
