Department of Animal Medicine, Production and Health, University of Padova, 35020 Legnaro, Italy

Deadline for manuscript submissions:

31 January 2025

Message from the Guest Editors

There is no doubt that vaccines represent a crucial resource for veterinary medicine, allowing for effectively preventing burdensome infectious and parasitic diseases of both producing and companion animals, and aiding in the pursuit of the One Health vision. Nonetheless, research on animal vaccines is progressing continuously to cope with the emergence of novel epidemiological threats, changes in animal production, stronger link among owners and pets within the domestic environment and technological advancements.

This Special Issue is aimed at collecting original research articles and reviews on the applications of vaccines in all fields of animal health, further advancing the knowledge of already available preparations or proposing novel solutions and applications.

Message from the Editor-in-Chief

Vaccines (ISSN 2076-393X) has had a 6-year history of publishing peer-reviewed state of the art research that advances the knowledge of immunology in human disease protection. Immunotherapeutics, prophylactic vaccines, immunomodulators, adjuvants and the global differences in regulatory affairs are some of the highlights of the research published that have shaped global health. Our open access policy allows all researchers and interested parties to immediately scrutinize the rigorous evidence our publications have to offer. We are proud to present the work and perspectives of many to contribute to future decisions concerning human health.

Author Benefits

Open Access: free for readers, with <u>article processing charges (APC)</u> paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Immunology) / CiteScore - Q1 (Pharmacology (medical))
