21 February 2025

Message from the Guest Editors

Dear Colleagues,

It is with great pleasure that I can introduce this Special Issue on “**Vaccination and Public Health in the 21st Century**”. Today, the discussion on vaccines is of great importance. Their significance in the eradication of different communicable diseases is clear and evident globally. In recent years, the COVID-19 pandemic has dominated our lives, and the development of several safe and effective vaccines has saved millions of lives across the world, as well as decreasing the chances of hospitalization for many more. This Special Issue aims to present the role of the vaccination in Public Health at a global level. This Special Issue focuses on laboratory and clinical vaccine research, its utilization, and immunization, as well as health technology assessments of new vaccines, their cost-effectiveness, safety, efficacy, etc. This collection of works does not focus on a specific country or disease. Articles that focus on the reappearance of communicable diseases that had been eradicated in the past are also very welcome. Moreover, articles that focus on the importance of vaccination in the public health will be processed with priority.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Vaccines (ISSN 2076-393X) has had a 6-year history of publishing peer-reviewed state of the art research that advances the knowledge of immunology in human disease protection. Immunotherapeutics, prophylactic vaccines, immunomodulators, adjuvants and the global differences in regulatory affairs are some of the highlights of the research published that have shaped global health. Our open access policy allows all researchers and interested parties to immediately scrutinize the rigorous evidence our publications have to offer. We are proud to present the work and perspectives of many to contribute to future decisions concerning human health.

Author Benefits

Open Access: free for readers, with **article processing charges (APC)** paid by authors or their institutions.

High Visibility: indexed within **Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.**

Journal Rank: JCR - Q1 (Immunology) / CiteScore - Q1 (Pharmacology (medical))
