Deadline for manuscript submissions:

30 December 2024

Message from the Guest Editor

Dear Colleagues,

Vaccinations save lives, but many people remain hesitant to get vaccinated against COVID-19 through fear of side effects. Increasing vaccine knowledge is therefore vital for a successful COVID-19 vaccine rollout. Understanding the reasons for vaccine hesitancy and the benefits of in vaccination disease prevention necessary. is Unvaccinated individuals have higher rates hospitalization and COVID-19-related morbidity and mortality. We invite you to submit original research articles or reviews to this Special Issue exploring the factors that contribute to hesitancy toward COVID-19 vaccination and the consequences of non-vaccination.

We look forward to receiving your contributions.

Vaccines (ISSN 2076-393X) has had a 6-year history of publishing peer-reviewed state of the art research that advances the knowledge of immunology in human disease protection. Immunotherapeutics, prophylactic vaccines, immunomodulators, adjuvants and the global differences in regulatory affairs are some of the highlights of the research published that have shaped global health. Our open access policy allows all researchers and interested parties to immediately scrutinize the rigorous evidence our publications have to offer. We are proud to present the work and perspectives of many to contribute to future decisions concerning human health.

Author Benefits

Open Access: free for readers, with <u>article processing charges (APC)</u> paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Immunology) / CiteScore - Q1 (Pharmacology (medical))
