Message from the Guest Editors

Dear Colleagues,

In the age of the COVID-19 pandemic, vaccine research and development has already saved many lives around the world, but still vaccine-preventable disease continue to cause significant deaths and economic burden globally as well.

Therefore, we are pleased to invite you to submit an article to this Special Issue of *Vaccines*, molecular immunology in the era of pandemic and beyond. The objective of this issue is to invite original research articles and reviews to enhance knowledge and better understanding of basic and immune responses after immunization of individuals in health and different ailments. Despite this, we also invite articles submitted on basic and clinical reviews, opinion and commentary pieces, visual pieces, and letters. The manuscripts outside these themes are also welcomed on the cellular, molecular, and behavioral response of vaccines, ethics, safety, and many other related areas.

We look forward to receiving your contributions.

Message from the Editor-in-Chief

Vaccines (ISSN 2076-393X) has had a 6-year history of publishing peer-reviewed state of the art research that advances the knowledge of immunology in human disease protection. Immunotherapeutics, prophylactic vaccines, immunomodulators, adjuvants and the global differences in regulatory affairs are some of the highlights of the research published that have shaped global health. Our open access policy allows all researchers and interested parties to immediately scrutinize the rigorous evidence our publications have to offer. We are proud to present the work and perspectives of many to contribute to future decisions concerning human health.

Author Benefits

Open Access: free for readers, with **article processing charges (APC)** paid by authors or their institutions.

High Visibility: indexed within **Scopus**, **SCIE (Web of Science)**, **PubMed**, **PMC**, **Embase**, **CAPLus / SciFinder**, and **other databases**.

Journal Rank: JCR - Q1 (Immunology) / CiteScore - Q1 (Pharmacology (medical))
