Deadline for manuscript submissions:

31 August 2024

Message from the Guest Editors

Dear Colleagues,

COVID-19 vaccination is one of the most successful and cost-effective health interventions to prevent and control SARS-CoV-2. It is important to understand trust, willingness, and other associated factors towards COVID-19 vaccines. This Special Issue will gather original reports, systematic reviews, and meta-analyses. Research areas may include, but are not limited to: (1) the levels and determinants of trust, hesitancy, willingness, and uptake of COVID-19 vaccination in the context where evidence is lacking, (2) the impacts of COVID-19 vaccination on SARS-CoV-2 infection, other health behaviors, and physical and mental health, (3) the facilitators and barriers to implementing COVID-19 vaccination programs, and (4) the evaluation of COVID-19 vaccination programs or interventions.

We look forward to receiving your contributions.

Message from the Editor-in-Chief

Vaccines (ISSN 2076-393X) has had a 6-year history of publishing peer-reviewed state of the art research that advances the knowledge of immunology in human disease protection. Immunotherapeutics, prophylactic vaccines, immunomodulators, adjuvants and the global differences in regulatory affairs are some of the highlights of the research published that have shaped global health. Our open access policy allows all researchers and interested parties to immediately scrutinize the rigorous evidence our publications have to offer. We are proud to present the work and perspectives of many to contribute to future decisions concerning human health.

Author Benefits

Open Access: free for readers, with **article processing charges (APC)** paid by authors or their institutions.

High Visibility: indexed within **Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.**

Journal Rank: JCR - Q1 (Immunology) / CiteScore - Q1 (Pharmacology (medical))
