Message from the Guest Editors

Dear Colleagues,

In these challenging times of rising infection and cancer rates, particularly in low- and middle-income countries, it is essential that countries learn from each other in order to improve future access to vaccines and vaccination coverage where there are concerns across all target groups. As a result reduce future morbidity and mortality, including mortality due to antimicrobial resistance from inappropriate prescribing of antimicrobials. We welcome original research papers and reviews on these key topics, with insights and suggested ways forward for immunization programmes to enhance public health, including those for COVID-19. Topics of interest include, but are not limited to, issues and challenges surrounding vaccines, including vaccine hesitancy and vaccine uptake, strategies to address misinformation and build vaccine confidence, and key economic considerations, including affordability. Waivers and reduced publication fees will be available on request for a limited number of papers that will enhance this Special Issue, especially those from low- and low-middle income countries.

Message from the Editor-in-Chief

Vaccines (ISSN 2076-393X) has had a 6-year history of publishing peer-reviewed state of the art research that advances the knowledge of immunology in human disease protection. Immunotherapeutics, prophylactic vaccines, immunomodulators, adjuvants and the global differences in regulatory affairs are some of the highlights of the research published that have shaped global health. Our open access policy allows all researchers and interested parties to immediately scrutinize the rigorous evidence our publications have to offer. We are proud to present the work and perspectives of many to contribute to future decisions concerning human health.

Author Benefits

Open Access: free for readers, with **article processing charges (APC)** paid by authors or their institutions.

High Visibility: indexed within **Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.**

Journal Rank: JCR - Q1 (Immunology) / CiteScore - Q1 (Pharmacology (medical))
