Deadline for manuscript submissions:

closed (30 June 2022)

Message from the Guest Editor

Dear Colleagues,

This Special Issue of Vaccines aims at addressing the unresolved key issues that hamper our understanding of the interactions between viruses and antibodies. The new presented studies will shed light on the multifaceted biological role that antibodies play during the course of virus infections. Both original research and review articles are welcome. Potential topics include, but are not limited to:

- Antigenic evolution and immunity to virus;
- Antibody and human cellular immune cell responses;
- Broadly cross-reactive and universal immunity to virus;
- Antigens and antibody in pathogenesis of viral infections;
- Dynamics of the antibody response during viral infections.
- We look forward to receiving your interested contribution.

Message from the Editor-in-Chief

Vaccines (ISSN 2076-393X) has had a 6-year history of publishing peer-reviewed state of the art research that advances the knowledge of immunology in human disease protection. Immunotherapeutics, prophylactic vaccines, immunomodulators, adjuvants and the global differences in regulatory affairs are some of the highlights of the research published that have shaped global health. Our open access policy allows all researchers and interested parties to immediately scrutinize the rigorous evidence our publications have to offer. We are proud to present the work and perspectives of many to contribute to future decisions concerning human health.

Author Benefits

Open Access: free for readers, with **article processing charges (APC)** paid by authors or their institutions.

High Visibility: indexed within **Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.**

Journal Rank: JCR - Q1 (Immunology) / CiteScore - Q1 (Pharmacology (medical))
