Deadline for manuscript  
submissions:

**closed (31 December 2023)**

### Message from the Guest Editor

Dear Colleagues,

The journal welcomes high-quality manuscripts that discuss the efficacy, effectiveness, safety and adverse events of either COVID-19 or non-COVID-19 vaccination in special populations. These special populations include, but are not limited to, the following: the very young, the elderly, pregnant women, patients who receive vaccination after prior infection, and immunocompromised patients. The manuscripts may be basic science papers, observational studies or interventional trials that aim to improve vaccine efficacy or minimize vaccine-related adverse events.

Dr. Kay Choong See

## Message from the Editor-in-Chief

*Vaccines* (ISSN 2076-393X) has had a 6-year history of publishing peer-reviewed state of the art research that advances the knowledge of immunology in human disease protection. Immunotherapeutics, prophylactic vaccines, immunomodulators, adjuvants and the global differences in regulatory affairs are some of the highlights of the research published that have shaped global health. Our open access policy allows all researchers and interested parties to immediately scrutinize the rigorous evidence our publications have to offer. We are proud to present the work and perspectives of many to contribute to future decisions concerning human health.

## Author Benefits

**Open Access:** free for readers, with **article processing charges (APC)** paid by authors or their institutions.

**High Visibility:** indexed within **Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.**

**Journal Rank:** JCR - Q1 (Immunology) / CiteScore - Q1 (Pharmacology (medical))
