Deadline for manuscript
submissions:

closed (30 June 2023)

Message from the Guest Editor

In recent decades, numerous studies focused on the virology, epidemiology, immunology, genetics, molecular biology, natural history, pathogenesis, current drug treatment, and new drug development in hepatitis research have strengthened our knowledge in this field. Such research provides the chance to identify and develop vaccines and treatments or cure viral hepatitis infections. Therefore, we welcome contributions to this Special Issue of *Viruses*, “State-of-the-Art Hepatitis Research in 2022”. The aim is to provide comprehensive information on all aspects of hepatitis research. Contributions to this Special Issue will advance our knowledge of hepatitis induced by virus infections and provide a better understanding of this serious human pathogen. This Special Issue will bring together original research papers and review manuscripts on hepatitis research with a focus on acute/chronic viral replication, pathogenesis, immune responses, vaccine development, hepatic disease, and antiviral treatments in viral hepatitis research.

Message from the Editor-in-Chief

Vaccines (ISSN 2076-393X) has had a 6-year history of publishing peer-reviewed state of the art research that advances the knowledge of immunology in human disease protection. Immunotherapeutics, prophylactic vaccines, immunomodulators, adjuvants and the global differences in regulatory affairs are some of the highlights of the research published that have shaped global health. Our open access policy allows all researchers and interested parties to immediately scrutinize the rigorous evidence our publications have to offer. We are proud to present the work and perspectives of many to contribute to future decisions concerning human health.

Author Benefits

Open Access: free for readers, with **article processing charges (APC)** paid by authors or their institutions.

High Visibility: indexed within **Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.**

Journal Rank: JCR - Q1 (Immunology) / CiteScore - Q1 (Pharmacology (medical))
