Message from the Guest Editors

Dear Colleagues,

This Special Issue of *Vaccines* will address key questions to improve our understanding and help us to produce better vaccines and antivirals. Potential topics include, but are not limited to, the following:

- DNA/RNA/protein-based vaccines;
- Correlates of immune protection;
- Novel vaccination strategies;
- Structure-based vaccine design;
- Vaccine formulations with an emphasis on nanoformulation;
- Small molecules and therapeutic antibodies;
- High-throughput screening platforms;
- Antiviral drug targets and mechanisms of action;
- Drug screening assays;
- Pharmacokinetic–pharmacodynamic studies of antivirals.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Vaccines (ISSN 2076-393X) has had a 6-year history of publishing peer-reviewed state of the art research that advances the knowledge of immunology in human disease protection. Immunotherapeutics, prophylactic vaccines, immunomodulators, adjuvants and the global differences in regulatory affairs are some of the highlights of the research published that have shaped global health. Our open access policy allows all researchers and interested parties to immediately scrutinize the rigorous evidence our publications have to offer. We are proud to present the work and perspectives of many to contribute to future decisions concerning human health.

Author Benefits

Open Access: free for readers, with **article processing charges (APC)** paid by authors or their institutions.

High Visibility: indexed within **Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.**

Journal Rank: JCR - Q1 (Immunology) / CiteScore - Q1 (Pharmacology (medical))
