Sciences and Pathobiology,  
University of Veterinary Medicine  
Vienna, Vienna, Austria

Deadline for manuscript  
submissions:

**closed (31 July 2021)**

### Message from the Guest Editor

Dear Colleagues,

This Special Issue focuses on the recent scientific progresses that enhance our understanding on mucosal immunoregulation and allergy. Based on your expertise, we invite you to submit an original report, observation or review that identifies (i) environmental contributors, (ii) immune pathways to sensitization, (iii) mechanisms of tolerance induction, and (iv) recent advances in novel prophylactic and therapeutic measurements.

Keywords:

- allergy
- mucosal immunology
- immune regulation
- environmental triggers
- microbes
- diet
- life style
- allergens
- inflammation
- tolerance

## Message from the Editor-in-Chief

*Vaccines* (ISSN 2076-393X), founded in 2013, now has a firm history of publishing peer-reviewed, state-of-the-art research papers on vaccines and vaccination in the broadest sense. Areas covered include, but are not limited to, novel and emerging vaccine technologies, building on in-depth knowledge of what constitutes a protective immune response. These can be new vaccines for old diseases, or old vaccines for new diseases. Vaccines against cancer and autoimmune diseases explicitly are also within the scope of the journal. Because public opinion and even government policies towards vaccines and vaccination have changed, vaccine policy and public health issues are major concerns. Climate change will also have an impact on the spread of infectious diseases, and thus also on vaccine and vaccination policies worldwide.

## Author Benefits

**Open Access:** free for readers, with **article processing charges (APC)** paid by authors or their institutions.

**High Visibility:** indexed within **Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.**

**Journal Rank:** JCR - Q2 (Medicine, Research and Experimental) / CiteScore - Q1 (Pharmacology (medical))
