Deadline for manuscript submissions:

closed (30 April 2021)

Message from the Guest Editor

Dear Colleagues,

We are therefore happy to announce a vaccines special issue dealing with the role of NK cells and non-NK ILCs in the context of infectious diseases with a special focus on their impact for the establishment of prophylactic or therapeutic immune interventions. We encourage the presentation of new findings and advances in this field of research that will contribute to the advancement of inventive modern medical approaches. These findings might encompass host-pathogen interactions or mechanisms of action in the context of murine infection or immunization studies as well as applied research and clinical studies.

Message from the Editor-in-Chief

Vaccines (ISSN 2076-393X) has had a 6-year history of publishing peer-reviewed state of the art research that advances the knowledge of immunology in human disease protection. Immunotherapeutics, prophylactic vaccines, immunomodulators, adjuvants and the global differences in regulatory affairs are some of the highlights of the research published that have shaped global health. Our open access policy allows all researchers and interested parties to immediately scrutinize the rigorous evidence our publications have to offer. We are proud to present the work and perspectives of many to contribute to future decisions concerning human health.

Author Benefits

Open Access: free for readers, with **article processing charges (APC)** paid by authors or their institutions.

High Visibility: indexed within **Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.**

Journal Rank: JCR - Q1 (Immunology) / CiteScore - Q1 (Pharmacology (medical))
