Deadline for manuscript
submissions:

closed (31 January 2025)

Message from the Guest Editor

We would like this Special Issue to focus on zoonotic and livestock viral diseases, with particular emphasis on infection and immunity. Topics could include studies on novel infection models/systems, the development of vaccine candidates or the validation of new diagnostic tools for the detection of viral agents. Studies looking at the immunological consequences of natural infection or vaccination (including the measurement of antibody titers, classification of T-cell populations or characterization of innate immune responses) would be of particular interest to this Special Issue.

Message from the Editor-in-Chief

Vaccines (ISSN 2076-393X) has had a 6-year history of publishing peer-reviewed state of the art research that advances the knowledge of immunology in human disease protection. Immunotherapeutics, prophylactic vaccines, immunomodulators, adjuvants and the global differences in regulatory affairs are some of the highlights of the research published that have shaped global health. Our open access policy allows all researchers and interested parties to immediately scrutinize the rigorous evidence our publications have to offer. We are proud to present the work and perspectives of many to contribute to future decisions concerning human health.

Author Benefits

Open Access: free for readers, with **article processing charges (APC)** paid by authors or their institutions.

High Visibility: indexed within **Scopus**, **SCIE (Web of Science)**, **PubMed**, **PMC**, **Embase**, **CAPLus / SciFinder**, and **other databases**.

Journal Rank: JCR - Q2 (Medicine, Research and Experimental) / CiteScore - Q1 (Pharmacology (medical))
