Elimination of Dog-Mediated Rabies through Vaccination—Target 2030

Guest Editor:

Dr. Shrikrishna Isloor

KVAFSU-CVA Rabies Diagnostic Laboratory, Department of Veterinary Microbiology, Veterinary College, KVAFSU, Bengaluru 560024, India

Deadline for manuscript submissions:

closed (31 January 2023)

Message from the Guest Editor

In this Special Issue, articles covering the implementation, strategies, outcomes, impacts, hurdles, and experiences of anti-rabies (pre- and post-)vaccination programs in both human and animal sectors globally are invited. Furthermore, this Special Issue may review the processes that support the scale-up of intervention strategies, put forth the views on pragmatic considerations with special reference to the duration of campaigns and the size of the work force, and finally provide examples of hypothetical resource requirements for implementing successful mass dog vaccination.

Message from the Editor-in-Chief

Vaccines (ISSN 2076-393X) has had a 6-year history of publishing peer-reviewed state of the art research that advances the knowledge of immunology in human disease protection. Immunotherapeutics, prophylactic vaccines, immunomodulators, adjuvants and the global differences in regulatory affairs are some of the highlights of the research published that have shaped global health. Our open access policy allows all researchers and interested parties to immediately scrutinize the rigorous evidence our publications have to offer. We are proud to present the work and perspectives of many to contribute to future decisions concerning human health.

Author Benefits

Open Access: free for readers, with <u>article processing charges (APC)</u> paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Immunology) / CiteScore - Q1 (Pharmacology (medical))
