Message from the Guest Editor

Dear Colleagues,

Immunotherapy has emerged as the next-generation frontier in cancer treatments, leading to relevant success in diverse cancer types, such as melanoma and lung cancer. Therefore, in this successful scenario, there is still an “unsuccessful” window for some cancer types.

Potential topics for this Issue include, but are not limited to, the following:

- The tumor (immune)-microenvironment as a target for immunotherapy;
- Immune cell polarization and immunotherapy;
- Immune cell angiogenic switch and immunotherapy;
- Molecular pathways in immunotherapy;
- Strategies to re-educate immune cells in cancers;
- Combination therapies acting on the immune system in cancer;
- Delivering strategies in immunotherapy;
- Nanotechnologies in immunotherapy;
- Phytochemicals endowed with immunostimulatory actions for immunotherapy approaches, including vaccines;
- Marine drugs endowed with immunostimulatory actions for immunotherapy approaches, including vaccines.

Message from the Editor-in-Chief

Vaccines (ISSN 2076-393X), founded in 2013, now has a firm history of publishing peer-reviewed, state-of-the-art research papers on vaccines and vaccination in the broadest sense. Areas covered include, but are not limited to, novel and emerging vaccine technologies, building on in-depth knowledge of what constitutes a protective immune response. These can be new vaccines for old diseases, or old vaccines for new diseases. Vaccines against cancer and autoimmune diseases explicitly are also within the scope of the journal. Because public opinion and even government policies towards vaccines and vaccination have changed, vaccine policy and public health issues are major concerns. Climate change will also have an impact on the spread of infectious diseases, and thus also on vaccine and vaccination policies worldwide.

Author Benefits

Open Access: free for readers, with **article processing charges (APC)** paid by authors or their institutions.

High Visibility: indexed within **Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.**

Journal Rank: JCR - Q2 (Medicine, Research and Experimental) / CiteScore - Q1 (Pharmacology (medical))
