Department of Medical Surgical Sciences and Translational Medicine, "Sapienza" University of Rome, 00185 Rome, Italy

Deadline for manuscript submissions:
31 March 2025

Message from the Guest Editor

It is well known that it is not enough to simply have safe and effective vaccines in order to achieve high vaccination coverage. Indeed, vaccine hesitancy is a global problem, and behavioural sciences are key to understanding, informing, and guiding research on the acceptance and uptake of COVID-19 vaccines.

This Special Issue will gather research focusing on insights from behavioural and social sciences applied to the context of COVID-19 vaccines. Theoretical contributions, reviews and meta-analyses, and original reports are all welcomed.

Message from the Editor-in-Chief

Vaccines (ISSN 2076-393X) has had a 6-year history of publishing peer-reviewed state of the art research that advances the knowledge of immunology in human disease protection. Immunotherapeutics, prophylactic vaccines, immunomodulators, adjuvants and the global differences in regulatory affairs are some of the highlights of the research published that have shaped global health. Our open access policy allows all researchers and interested parties to immediately scrutinize the rigorous evidence our publications have to offer. We are proud to present the work and perspectives of many to contribute to future decisions concerning human health.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.
Journal Rank: JCR - Q1 (Immunology) / CiteScore - Q1 (Pharmacology (medical))
