Message from the Guest Editor

Dear Colleagues,

As public hesitancy toward vaccines increases throughout the world, practical solutions are desperately needed. This issue is complex, with no simple solution to it. However, research in this space has identified a range of multifaceted strategies that can have positive effects. This Special Issue focuses on the science of reducing vaccine hesitancy and improving vaccine uptake across diverse populations.

Message from the Editor-in-Chief

Vaccines (ISSN 2076-393X) has had a 6-year history of publishing peer-reviewed state of the art research that advances the knowledge of immunology in human disease protection. Immunotherapeutics, prophylactic vaccines, immunomodulators, adjuvants and the global differences in regulatory affairs are some of the highlights of the research published that have shaped global health. Our open access policy allows all researchers and interested parties to immediately scrutinize the rigorous evidence our publications have to offer. We are proud to present the work and perspectives of many to contribute to future decisions concerning human health.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.
Journal Rank: JCR - Q1 (Immunology) / CiteScore - Q1 (Pharmacology (medical))
