Message from the Guest Editors

Dear Colleagues,

We are delighted to announce the launch of a Special Issue focusing on “Veterinary Vaccines and One Health.” As zoonotic spillover events continue to increase in frequency, multiple strategies to control outbreaks are necessary to protect human health. Such a strategy is multi-faceted and relies on vaccine availability for companion animals, livestock, and wildlife. However, these require unique consideration for vaccine protocols to accommodate challenges such as distribution, repeat vaccination, and surveillance.

In this Special Issue, original research articles, communications, reviews, and case studies are welcome. Research areas may include (but not limited to) the following: wildlife vaccine strategies, transmissible vaccines, companion animal preventative health, pre-clinical and clinical trials, and methods for assessing vaccine efficacy.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Vaccines (ISSN 2076-393X) has had a 6-year history of publishing peer-reviewed state of the art research that advances the knowledge of immunology in human disease protection. Immunotherapeutics, prophylactic vaccines, immunomodulators, adjuvants and the global differences in regulatory affairs are some of the highlights of the research published that have shaped global health. Our open access policy allows all researchers and interested parties to immediately scrutinize the rigorous evidence our publications have to offer. We are proud to present the work and perspectives of many to contribute to future decisions concerning human health.

Author Benefits

Open Access: free for readers, with **article processing charges (APC)** paid by authors or their institutions.

High Visibility: indexed within **Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.**

Journal Rank: JCR - Q2 (Medicine, Research and Experimental) / CiteScore - Q1 (Pharmacology (medical))
