8 July 2025

Message from the Guest Editors

Dear Colleagues,

It is generally known that vaccination is one of the most effective interventions to prevent multiple infectious diseases. However, with the incidents of vaccines happening frequently, vaccine hesitancy seriously affects people's confidence towards vaccines, thus posing a great threat to public health. As a risk choice closely related to health, vaccination is influenced by many social determinants, such as personal economic status and so on. Therefore this Special Issue aims to collect the latest developments in social determinants and vaccine research, including the relationship between social determinants and vaccination, what kind of social determinants are the positive/negative factors of vaccination, and how to effectively improve the vaccination rate through the intervention of social determinants. Potential topics for submissions include but are not limited to:

1. Relationship between social determinants and attitudes towards vaccine
2. How social determinants affect the vaccine acceptance/hesitancy
3. Interventions that change social determinants, thereby promoting vaccination

Message from the Editor-in-Chief

Vaccines (ISSN 2076-393X) has had a 6-year history of publishing peer-reviewed state of the art research that advances the knowledge of immunology in human disease protection. Immunotherapeutics, prophylactic vaccines, immunomodulators, adjuvants and the global differences in regulatory affairs are some of the highlights of the research published that have shaped global health. Our open access policy allows all researchers and interested parties to immediately scrutinize the rigorous evidence our publications have to offer. We are proud to present the work and perspectives of many to contribute to future decisions concerning human health.

Author Benefits

Open Access: free for readers, with **article processing charges (APC)** paid by authors or their institutions.

High Visibility: indexed within **Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.**

Journal Rank: JCR - Q1 (Immunology) / CiteScore - Q1 (Pharmacology (medical))
