### Message from the Guest Editors

Dear Colleagues,

Infectious diseases are illnesses caused by pathogens. The timely diagnosis of the pathogens causing disease is important for the prompt treatment of such infectious diseases. As antimicrobial resistance has increased in recent decades, the rapid detection of pathogens has become crucial to improve clinical outcomes and prevent the development of drug resistance.

In this Special Issue, original research articles and reviews focused on all aspects of infectious diseases are welcome, especially those focused on diagnosis and treatment. The epidemiology of drug-resistant pathogens will also be considered. Research areas may include (but are not limited to) the following: surveillance studies conducted in hospitals and communities, newly discovered resistant pathogens, newly therapeutic strategies, new detection methods, and novel resistance mechanisms.

We look forward to receiving your contributions.

Dr. Yung-Chih Wang

Dr. Yi-Tzu Lee

Dr. Cheng-Han Chen

## Message from the Editor-in-Chief

*Vaccines* (ISSN 2076-393X), founded in 2013, now has a firm history of publishing peer-reviewed, state-of-the-art research papers on vaccines and vaccination in the broadest sense. Areas covered include, but are not limited to, novel and emerging vaccine technologies, building on in-depth knowledge of what constitutes a protective immune response. These can be new vaccines for old diseases, or old vaccines for new diseases. Vaccines against cancer and autoimmune diseases explicitly are also within the scope of the journal. Because public opinion and even government policies towards vaccines and vaccination have changed, vaccine policy and public health issues are major concerns. Climate change will also have an impact on the spread of infectious diseases, and thus also on vaccine and vaccination policies worldwide.

## Author Benefits

**Open Access:** free for readers, with **article processing charges (APC)** paid by authors or their institutions.

**High Visibility:** indexed within **Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.**

**Journal Rank:** JCR - Q2 (Medicine, Research and Experimental) / CiteScore - Q1 (Infectious Diseases)
