Message from the Guest Editors

Dear Colleagues,

The impact of influenza vaccination on reducing the risk of influenza virus infection has been well-documented. In addition to protecting against infection, the vaccine can significantly lower the risk of mortality and other complications associated with the virus, making it highly recommended, especially for high-risk populations such as the elderly, patients with chronic diseases, and healthcare providers. While research has demonstrated other potential benefits of influenza vaccination, detailed clinical data and mechanisms supporting its additional effects among patients with chronic diseases are still lacking.

By gaining a deeper understanding of the protective benefits of the influenza vaccine beyond infection prevention, we can further improve the long-term outcomes of patients with chronic diseases. Therefore, we invite you to submit research articles on the effectiveness and potential mechanisms of the influenza vaccine in this population. We welcome the submission of clinical observational studies, randomized control trials, and basic molecular/animal investigations.

Message from the Editor-in-Chief

Vaccines (ISSN 2076-393X) has had a 6-year history of publishing peer-reviewed state of the art research that advances the knowledge of immunology in human disease protection. Immunotherapeutics, prophylactic vaccines, immunomodulators, adjuvants and the global differences in regulatory affairs are some of the highlights of the research published that have shaped global health. Our open access policy allows all researchers and interested parties to immediately scrutinize the rigorous evidence our publications have to offer. We are proud to present the work and perspectives of many to contribute to future decisions concerning human health.

Author Benefits

Open Access: free for readers, with **article processing charges (APC)** paid by authors or their institutions.

High Visibility: indexed within **Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.**

Journal Rank: JCR - Q1 (Immunology) / CiteScore - Q1 (Pharmacology (medical))
