Message from the Guest Editor

Dear Colleagues,

As Section Editor-in-Chief of *Epidemiology*, I am glad to announce the Special Issue "Feature Papers of Epidemiology and Vaccines 2.0". This Special Issue is aimed to enhance the impact of the interactions and effects of vaccines (and vaccination programs) on the occurrence of vaccine-preventable diseases.

In this Special Issue, we will collect articles from top researchers describing new approaches or new cutting-edge developments in the fields of infectivity, vaccine efficacy and effectiveness, vaccine failure, herd immunity, herd effect, epidemiological transfer, and disease modeling of various epidemics. Moreover, this Special Issue also considers the viewpoints of major stakeholders, including immunization program managers, public health experts, pediatricians, family doctors, and other experts/individuals involved in the provision of immunization services and those who conduct research on awareness and behaviors surrounding vaccine epidemiology, as well as in other relevant scientific fields. We welcome the submission of manuscripts from Editorial Board Members and from outstanding scholars invited by the Editorial Board and the Editorial Office.

an Open Access Journal by MDPI

Editor-in-Chief

Message from the Editor-in-Chief

Vaccines (ISSN 2076-393X) has had a 6-year history of publishing peer-reviewed state of the art research that advances the knowledge of immunology in human disease protection. Immunotherapeutics, prophylactic vaccines, immunomodulators, adjuvants and the global differences in regulatory affairs are some of the highlights of the research published that have shaped global health. Our open access policy allows all researchers and interested parties to immediately scrutinize the rigorous evidence our publications have to offer. We are proud to present the work and perspectives of many to contribute to future decisions concerning human health.

Author Benefits

Open Access: free for readers, with **article processing charges (APC)** paid by authors or their institutions.

High Visibility: indexed within **Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.**

Journal Rank: JCR - Q1 (Immunology) / CiteScore - Q1 (Pharmacology (medical))
