2. Department of Vascular Biology of the Institute of Metabolic and Cardiovascular Diseases (I2MC), Université de Toulouse 3, Institut National de la Santé et de la Recherche Médicale (INSERM) UMR1048, Toulouse, France

### Message from the Guest Editor

In this Special Issue of Vaccine, we focus on recent progresses made in the field of vaccinology, as well as future directions identified for solid organ transplant patients. Based on your extensive knowledge and experience, we invite you to contribute with an original report, personal point of view, or review to highlight (i) specific organization models proposed to improve vaccination rate in this population, (ii) immune pathways developed to improve immunogenicity of vaccines or alternative strategies for transplant recipients, (iii) future directions concerning the development of new vaccines.

Deadline for manuscript submissions:

**closed (30 June 2023)**

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

*Vaccines* (ISSN 2076-393X), founded in 2013, now has a firm history of publishing peer-reviewed, state-of-the-art research papers on vaccines and vaccination in the broadest sense. Areas covered include, but are not limited to, novel and emerging vaccine technologies, building on in-depth knowledge of what constitutes a protective immune response. These can be new vaccines for old diseases, or old vaccines for new diseases. Vaccines against cancer and autoimmune diseases explicitly are also within the scope of the journal. Because public opinion and even government policies towards vaccines and vaccination have changed, vaccine policy and public health issues are major concerns. Climate change will also have an impact on the spread of infectious diseases, and thus also on vaccine and vaccination policies worldwide.

## Author Benefits

**Open Access:** free for readers, with **article processing charges (APC)** paid by authors or their institutions.

**High Visibility:** indexed within **Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPus / SciFinder, and other databases.**

**Journal Rank:** JCR - Q2 (Medicine, Research and Experimental) / CiteScore - Q1 (Infectious Diseases)
