

Special Issue

Vaccines for Patients With Immunodeficiencies and Their Efficacy: An Overview in Pandemic Era

Message from the Guest Editors

we are pleased to invite you to submit a contribution to this Special Issue

- The aim is to have a comprehensive analysis of types of vaccines in current use for Immunocompromised patients until the latest use for SARS-CoV2 infection. Taking in consideration the advanced technologies rapidly expanded over the last years in computational analysis or the predictive models and in vitro immunoassay, this special issue wants to explore the effectiveness of the vaccines to optimize the development of safety and tolerable protocols for vulnerable patients.
- This Special Issue will collect the following article types: Original research articles, Clinical Case reports, Reviews and Perspective analysis. The Research areas may include the following subjects (but not limited to): Clinical Immunology, Mathematical modeling, Machine learning analysis, Cellular Immunology. Allergology, Virology.

We look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

Vaccines (ISSN 2076-393X), founded in 2013, now has a firm history of publishing peer-reviewed, state-of-the-art research papers on vaccines and vaccination in the broadest sense. Areas covered include, but are not limited to, novel and emerging vaccine technologies, building on in-depth knowledge of what constitutes a protective immune response. These can be new vaccines for old diseases, or old vaccines for new diseases. Vaccines against cancer and autoimmune diseases explicitly are also within the scope of the journal. Because public opinion and even government policies towards vaccines and vaccination have changed, vaccine policy and public health issues are major concerns. Climate change will also have an impact on the spread of infectious diseases, and thus also on vaccine and vaccination policies worldwide.

Editor-in-Chief

Prof. Dr. Ger Rijkers

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Medicine, Research and Experimental) /
CiteScore - Q1 (Infectious Diseases)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.1 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the second half of 2025).
