

Special Issue

Compulsory Vaccination against COVID-19, Influenza and Monkeypox: Pros and Cons

Message from the Guest Editors

The continuous emergence and re-emergence of infectious diseases require public health control measures aiming to reduce their negative health, economic and social impact. Vaccination is considered the mainstay preventive measure to control infectious diseases. This was evident during the ongoing COVID-19 pandemic, during which the swift availability of safe and effective vaccines helped to reduce the burden of disease. Nevertheless, the successful implementation of COVID-19 vaccination campaigns was challenged by the issue of COVID-19 vaccine hesitancy. The pros and cons of vaccine mandates is a research area that needs further investigation. This Special Issue will focus on the studies addressing attitude towards compulsory vaccination, with a special focus on seasonal influenza, COVID-19, and monkeypox vaccine mandates.

About the Journal

Message from the Editor-in-Chief

Vaccines (ISSN 2076-393X) has had a 6-year history of publishing peer-reviewed state of the art research that advances the knowledge of immunology in human disease protection. Immunotherapeutics, prophylactic vaccines, immunomodulators, adjuvants and the global differences in regulatory affairs are some of the highlights of the research published that have shaped global health. Our open access policy allows all researchers and interested parties to immediately scrutinize the rigorous evidence our publications have to offer. We are proud to present the work and perspectives of many to contribute to future decisions concerning human health.

Editor-in-Chief

Prof. Dr. Ralph A. Tripp

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q1 (Immunology) / CiteScore - Q1 (Pharmacology (medical))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.6 days after submission; acceptance to publication is undertaken in 3.3 days (median values for papers published in this journal in the second half of 2024).
