Laboratoire sur La Perception, les Interactions, les Comportements et la Simulation des Usagers de la Route et de la Rue (PICS-L), Université Gustave Eiffel, Marne la Vallée, France

**Dr. Claudio Lantieri**

Department of Civil, Chemical, Environmental, and Materials Engineering, Alma Mater Studiorum Università di Bologna, Bologna, Italy

Deadline for manuscript submissions:

**closed (31 January 2025)**

### Message from the Guest Editors

Dear Colleagues,

Intelligent transportation systems (ITSs) use emerging technologies to advance transportation safety, improve mobility and operating efficiency and reliability, enhance user productivity, maintain transportation sustainability, and reduce the environmental impact of the growing demand for travel.

For this Special Issue, we welcome interdisciplinary research involving vehicles and transportation infrastructure, as well as integrated applications combining the two. Topics include, but are not limited to, the following:

- Automated vehicle (AV) technology;
- Connected and automated vehicle (CAV);
- Cooperative driving automation (CDA);
- Vehicle to everything (V2X) technologies, including vehicle-to-pedestrian (V2P), vehicle-to-vehicle (V2V), and vehicle-to-infrastructure (V2I);
- Intelligent traffic control systems and next-generation traffic management systems;
- Intelligent commercial vehicle systems;
- Advanced transit systems;
- Privacy and security of ITS.

an Open Access Journal by MDPI

## Editor-in-Chief

Technologies, Université Paris-  
Saclay, 91020 Evry, France

## Message from the Editor-in-Chief

In response to economic, political, and environmental pressures, the automotive vehicle community is expanding its research, development, and production of more energysaving, environmentally friendly, and safer ground vehicles through vehicle electrification, powertrain hybridization, high-efficiency drivetrain, autonomous or automated driving, vehicle connectivity, and infrastructure.

*Vehicles* is a new open access and peer-reviewed international journal that will facilitate rapid publication of scholarly articles on studies related to ground vehicles. Its mission is to publish cutting edge articles, conference proceedings, and to organize Special Issues which highlight outstanding research on specific topics regarding all landbased vehicles with regards to the design, modeling and simulation, manufacture, testing, and operation and modification of those vehicles and their engineering systems.

## Author Benefits

**Open Access:** free for readers, with **article processing charges (APC)** paid by authors or their institutions.

**High Visibility:** indexed within **Scopus, ESCI (Web of Science), Ei Compendex**, and **other databases**.

**Journal Rank:** JCR - Q2 (Engineering, Mechanical) / CiteScore - Q2 (Automotive Engineering)
