Message from the Guest Editors

Dear Colleagues,

Both the environment, plants, animals (both wildlife and livestock), and humans are interconnected in a biological way. Next to that, the Quadripartite Organizations (FAO, UNEP, WHO, and WOAHP) have launched a new initiative with their publication “ONE HEALTH JOINT PLAN OF ACTION (2022–2026)”, advocating for the inclusion of society and social sciences in the approach. Holistic and sustainable solutions are also warranted.

In this Special Issue, we invite all actors in the field of One Health, including, but not restricted, medical corps, veterinary corps, plant scientists, environmental scientists, as well as sociologists. Adhering to the holistic approach, we also invite scientists with new ideas in the approach of One Health.

We invite researchers to submit research manuscripts, reviews, and (superficially for this Special Issue) opinions related to all the fields of One Health.

Prof. Dr. Patrick Butaye

Message from the Editor-in-Chief

Veterinary Sciences (ISSN 2306-7381) is an international and interdisciplinary scholarly open access journal that aims at publishing research in all fields of veterinary medicine in a democratic way. We encourage scientists to publish their original research articles, reviews, communications, and short notes in as much detail as possible. Articles submitted that involve subjecting animals to unnecessary pain or suffering will not be accepted, and all articles must be submitted with the necessary ethical approval (please refer to the Ethical Guidelines for more information).

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PubAg, AGRIS, and other databases.

Journal Rank: JCR - Q1 (Veterinary Sciences) / CiteScore - Q1 (General Veterinary)
