Message from the Guest Editor

Dear Colleagues,

Research and publications in recent years have allowed for a greater characterization of the different biological entities included under the definition of lymphoma. Laboratory analyses have played an important role, but the usefulness of an integrated approach between different competences and the need to deepen the knowledge in a multidisciplinary way have become clear. This is especially true for the dog, for whom the acquired knowledge has led to its recognition as a possible spontaneous animal model for the human counterpart. Much of this work is still to be addressed for feline lymphomas, whose peculiarities place greater limits both to clinicians and researchers. Many aspects remain to be clarified or explored both in canine and feline lymphomas and the need for more (and more specific) diagnostic and prognostic laboratory tests as well as for a greater effort to discover new potential target for therapy is emerging.

Message from the Editor-in-Chief

Veterinary Sciences (ISSN 2306-7381) is an international and interdisciplinary scholarly open access journal that aims at publishing research in all fields of veterinary medicine in a democratic way. We encourage scientists to publish their original research articles, reviews, communications, and short notes in as much detail as possible. Articles submitted that involve subjecting animals to unnecessary pain or suffering will not be accepted, and all articles must be submitted with the necessary ethical approval (please refer to the Ethical Guidelines for more information).

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PubAg, AGRIS, and other databases.

Journal Rank: JCR - Q2 (Veterinary Sciences) / CiteScore - Q2 (General Veterinary)
