### Message from the Guest Editor

Dear Colleagues,

Regarding epidemiologic studies, cardiovascular disorders are considered the number one cause of morbimortality in Western countries. In fact, despite the promising advances in patient care, the incidence of cardiovascular disease continues to increase. For that reason, advancing in novel therapeutic and diagnostic tools in this field is crucial.

In order to translate the advances from basic research to the bedside, an important step is to explore, in detail, the pathophysiology of some cardiovascular diseases as well as novel diagnostic and therapeutic tools in animal models, always prioritizing animal welfare and humane treatment.

The aim of this Special Issue is to publish original research papers and reviews exploring cardiovascular diseases through animal models, acting as a bridge between bench research and clinics.

Dr. Amparo Ruíz-Saurí

## Message from the Editor-in-Chief

Veterinary Sciences (ISSN 2306-7381) is an international and interdisciplinary scholarly open access journal that aims at publishing research in all fields of veterinary medicine in a democratic way. We encourage scientists to publish their original research articles, reviews, communications, and short notes in as much detail as possible. Articles submitted that involve subjecting animals to unnecessary pain or suffering will not be accepted, and all articles must be submitted with the necessary ethical approval (please refer to the Ethical Guidelines for more information).

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PubAg, AGRIS, and other databases.

**Journal Rank:** JCR - Q2 (*Veterinary Sciences*) / CiteScore - Q2 (*General Veterinary*)
