Deadline for manuscript  
submissions:

**10 June 2024**

### Message from the Guest Editor

Dear Colleagues,

It is estimated that, globally, about one billion cases of illness and millions of deaths occur every year from zoonoses. About 60% of emerging infectious diseases that are reported globally are zoonoses. Over 30 new human pathogens have been detected in the last three decades, 75% of which have originated in animals. In the last few years, much progress has been achieved in the diagnosis of infectious diseases in wildlife, but additional information and studies are necessary to improve the identification and characterization of old and new pathogens in wild species, including zoonotic agents. The aim of this Special Issue is to publish original research work or reviews on these topics in order to give an effective improvement of the current knowledge with a One Health approach of infectious diseases.

Dr. Vittorio Sarchese

## Message from the Editor-in-Chief

Veterinary Sciences (ISSN 2306-7381) is an international and interdisciplinary scholarly open access journal that aims at publishing research in all fields of veterinary medicine in a democratic way. We encourage scientists to publish their original research articles, reviews, communications, and short notes in as much detail as possible. Articles submitted that involve subjecting animals to unnecessary pain or suffering will not be accepted, and all articles must be submitted with the necessary ethical approval (please refer to the Ethical Guidelines for more information).

## Author Benefits

**Open Access:** free for readers, with **article processing charges (APC)** paid by authors or their institutions.

**High visibility:** indexed within **Scopus**, **SCIE (Web of Science)**, **PubMed**, **PMC**, **Embase**, **PubAg**, **AGRIS**, and **other databases**.

**Journal Rank:** JCR - Q1 (*Veterinary Sciences*) / CiteScore - Q2 (*General Veterinary*)
