Message from the Guest Editors

Dear Colleagues,

Reconstructive surgery can be used for management after neoplastic asportation or for wound management. It may include cutaneous surgery, the use of titanium mesh for head and neck reconstruction or the use of polypropylene mesh for large defects of the thoracic or abdominal walls. This Special Issue aims to provide selected contributions on basic and advanced surgery techniques in reconstructive surgery.

Potential topics include, but are not limited to: reconstructed abdominal walls; reconstructed thoracic walls; reconstructive head and neck surgery; tubular flap; use of myocutaneous flaps; use of titanium mesh; use of polypropylene mesh; vascular flap; prospective uses of titanium 3D printing.

Dr. Roberto Tamburro

Dr. Francesco Collivignarelli

Message from the Editor-in-Chief

Veterinary Sciences (ISSN 2306-7381) is an international and interdisciplinary scholarly open access journal that aims at publishing research in all fields of veterinary medicine in a democratic way. We encourage scientists to publish their original research articles, reviews, communications, and short notes in as much detail as possible. Articles submitted that involve subjecting animals to unnecessary pain or suffering will not be accepted, and all articles must be submitted with the necessary ethical approval (please refer to the Ethical Guidelines for more information).

Author Benefits

Open Access: free for readers, with **article processing charges (APC)** paid by authors or their institutions.

High visibility: indexed within **Scopus**, **SCIE (Web of Science)**, **PubMed**, **PMC**, **Embase**, **PubAg**, **AGRIS**, and **other databases**.

Journal Rank: JCR - Q1 (Veterinary Sciences) / CiteScore - Q1 (General Veterinary)
