Message from the Guest Editors

Dear Colleagues,

Cancer in pets is an increasing cause of morbidity and mortality worldwide. Driven by the development of novel techniques and the deepening of knowledge pertaining to tumor biology, veterinary oncology has witnessed substantial advances in the last decade.

The integration of morphological features with the molecular and genomic characterization of tumors and clinicopathological data allowed the pathologic basis of cancer in animals to be elucidated, in order to identify druggable targets, develop specific treatments tailored to the tumor type, as well as to better anticipate the prognosis and predict the response to treatment.

This Special Issue of Veterinary Science is focused on the current knowledge and recent advances in veterinary oncology. We encourage submissions of original research articles and reviews that focus on various aspects of veterinary oncology, including tumor pathology, cancer genetics and epigenetics, diagnostic and prognostic tools, and novel therapeutic approaches.

Message from the Editor-in-Chief

Veterinary Sciences (ISSN 2306-7381) is an international and interdisciplinary scholarly open access journal that aims at publishing research in all fields of veterinary medicine in a democratic way. We encourage scientists to publish their original research articles, reviews, communications, and short notes in as much detail as possible. Articles submitted that involve subjecting animals to unnecessary pain or suffering will not be accepted, and all articles must be submitted with the necessary ethical approval (please refer to the Ethical Guidelines for more information).

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PubAg, AGRIS, and other databases.

Journal Rank: JCR - Q2 (*Veterinary Sciences*) / CiteScore - Q2 (*General Veterinary*)
