### Message from the Guest Editor

Dear Colleagues,

The relation of morphological traits and productive performance of farm animals is a classic and always relevant issue in veterinary sciences. The influence of animal morphology is a key factor in many aspects of animal husbandry and especially in meat and milk production. This issue on “The influence and relation of Morphological Characteristics on Productive Performance in Farm Animals” addresses that need to broaden the exchange of information between veterinary and animal production sciences, through publication of research and review articles or short communications in this discipline. It is hoped that this special issue will further fascinate the research towards the production of good quality and healthy foods of animal origin taking into account the animal welfare.

Dr. Aris Pourlis

## Message from the Editor-in-Chief

Veterinary Sciences (ISSN 2306-7381) is an international and interdisciplinary scholarly open access journal that aims at publishing research in all fields of veterinary medicine in a democratic way. We encourage scientists to publish their original research articles, reviews, communications, and short notes in as much detail as possible. Articles submitted that involve subjecting animals to unnecessary pain or suffering will not be accepted, and all articles must be submitted with the necessary ethical approval (please refer to the Ethical Guidelines for more information).

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PubAg, AGRIS, and other databases.

**Journal Rank:** JCR - Q2 (*Veterinary Sciences*) / CiteScore - Q2 (*General Veterinary*)
