### Message from the Guest Editor

Dear Colleagues,

In this Special Issue, we are pleased to invite scholarly articles pertaining to nutritional disorders in companion animals. Most commonly, these disorders can be attributed to the dietary intake being insufficient or excessive in particular nutrients, or to the animal's inability to absorb or utilize nutrients. Different life stages and physiological states create additional nutritional challenges, and consequently some of these nutritional disorders arise in otherwise healthy animals during growth, strenuous exercise, or gestation and lactation. Topics contributed to this special issue may include any condition that is directly attributable to the diet; or any condition that is ameliorated by dietary intervention even where the diet is not the cause of the disease, such as is the case with certain inherited metabolic disorders.

We look forward to receiving your contributions,

Dr. Wendy Brown

## Message from the Editor-in-Chief

Veterinary Sciences (ISSN 2306-7381) is an international and interdisciplinary scholarly open access journal that aims at publishing research in all fields of veterinary medicine in a democratic way. We encourage scientists to publish their original research articles, reviews, communications, and short notes in as much detail as possible. Articles submitted that involve subjecting animals to unnecessary pain or suffering will not be accepted, and all articles must be submitted with the necessary ethical approval (please refer to the Ethical Guidelines for more information).

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PubAg, AGRIS, and other databases.

**Journal Rank:** JCR - Q2 (*Veterinary Sciences*) / CiteScore - Q2 (*General Veterinary*)
